

1 APPARATUS FOR TREATING  
2 AMMONIATED MEATS

3 ABSTRACT OF THE DISCLOSURE

4 An initial comminuted meat (21) is exposed to ammonia to produce an ammoniated  
5 meat product. The ammoniated meat product is further comminuted in a comminuting device  
6 (12) to produce a further comminuted meat product (22). The ammonia exposure to the  
7 original comminuted meat product (21) is controlled to result in a pH of at least around 6.0 in  
8 the further comminuted meat product (22).
